I think we're getting pretty close!

I added in some questions that we talked about, mostly just grouped things together (pressure drop, etc.). I added in one definition and added more detail to the citations. Also added some comments (some responses and some new things) to talk about). Let me know if you want to meet Thursday or the following Monday so we can finalize this.

Thanks!

As for which section chief should be named (whoever will review it): Who has more experience with Paper & Pulp mills? We should have that person review it.
